

## Command Guide

### How to unlock the 8 image/screen mode for iShare +?

In order to work with iControl K10 control keypad, the iShare+ is locked to be 4 images/screen. If you want to unlock to be 8 images/screen, please follow this command guide.

#### Step 1:

windows + R

Input: telnet 192.168.1.8 24 (If you already changed the IP for the iShare+, please input your correct IP address)

Username: root

No password

#### Step 2:

Input command:

```
gblayout--add-no 0x203-name layout203-main 1 3 0 1125 12000 6750
```

```
12000 1125 4000 2250 12000 3375 4000 2250
```

Input command:

```
gblayout--set-sequence 0x100 0x101 0x103 0x105 0x106 0x203
```

Then after command run, please check if the buttons work?

```
gblayout--auto y
```

```
